

Aerial Work Platforms

Aerial Work Platforms - There are many accessories for forklifts which can be used to help expand the functionality of your forklift and allow you to carry objects, handle materials with greater ease or to finish clean-up tasks.

Lots of the accessories are specially designed in order to fit on the forks themselves. Fork extensions for instance, are used whenever you need a lot more fork length, that increases lifting capacity. Fork extensions come in lengths varying from 48-120 inches. Rounded or triangular accessories are another type utilized if moving rolled material so as to make sure it does not roll off of the typical flat blades.

Lifting accessories can be pivoting and telescoping crane accessories. They come in numerous styles. These attachments are normally used for transporting lumber, metal bars, poles or any sort of bulky stuff. Additional accessories like other kinds of hooks and hook plates are available in order to lift stuff utilizing a chain or sling. Slab lifters and magnetic filters are other things that could be used along with hook attachments. Slab lifters are specialized accessories that are intended for picking up different materials that are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools that connect to your lift truck in order to make moving rolls of carpet a lot easier. The accessory hooks onto the lift truck's blades and has a pole which goes through the middle of the carpet roll.

There are several other kinds of lift truck attachments which could be utilized for facility maintenance such as snow forks. These forks connect to front end loaders and can transport materials like for instance snow, dirt and soil. Other common cleanup attachments consist of magnetic sweepers and standard sweepers. Standard sweepers comprise a broom that the forklift forks hook onto for sweeping large spaces like for instance warehouse, factory floors and parking lots. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is used in areas where there is lots of metal fragments like on shop floors for instance. Sweepers have widths up to 60 inches and this surface area makes clean up quick and simple.

Material spreaders are other accessories utilized on lift trucks. These spreaders are useful for various applications like for example spreading pellets, fertilizers, insecticides, seeds, ice melt and rock salt.

Work platforms are another optional lifting attachment which a lot of businesses make use of day by day. The platforms range in size from 36" x 36" to up to 60" x 60". There are a few models accessible that are capable of folding up and storing into a smaller space. Work platforms are designed to raise workers up to an overhead location with the use of the lift truck. Larger platform units have extra space for personnel so as to carry tools and other essential items meant for the task. Usually work platforms are constructed of poly material or steel.
