

JLG Forklift Parts

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country excursion in their RV. Recently retired, after spending several years working with his brother to assemble their crane company into an industry leader, John had no idea that momentous trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road expedition.

All through their trip, John reacquainted himself with former business connections along the way. In combination with these conversations and a noteworthy event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a vast market for a product that could promptly and securely lift people in the air to accomplish upkeep and other building functions.

After returning from their vacation, John set up a partnership with two of his friends and purchased a metal fabricating company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty employees, they produced and sold their first JLG aerial work platform in 1970. The company incorporates some of the simple design elements of that original lift into current versions.

JLG lift trucks have come a long way since Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Nowadays, the business proudly continues to expand itself into numerous marketplaces globally and develops new products to make sure consumers are capable of being more effective and perform in the workplace within a safer environment.
