

Advance-Nilfisk Part

Advance-Nilfisk Part - Think about how long and tiresome it would really be to clean-up after a party, with no help from machines. Previously, the dirt from carpets and upholstery had to be beat out of them by hand; brooms, brushes and cleaning cloths were the top cleaning products back then.

The man who established Nilfisk-Advance, P.A. Fisker, started out as an electrical engineer who liked to work on electrical motors. After founding his business during the year 1906, he started to make motors to drive machine tools, drills, coffee grinders and fans. Mr. Fisker's dream from the start was to have a worldwide company advertising goods globally.

The Nilfisk C1 was an incredible breakthrough for the cleaning trade. This ground breaking vacuum cleaner, invented by Mr. Fisker, weighed only 17.5 kilos and can be operated by one individual. This creation came in a time where other cleaning machines were huge and required 4 or more operators, thus, the Nilfisk C1 changed everything and developed the way we clean forever. The brain behind these very first cleaning machines remains unparalleled. Cleaning machines provide a brilliant solution to an ongoing problem; things get dirty and must be cleaned regularly, without a lot of effort.

Slowly, the business Nilfisk-Advance grew throughout the years. In the early nineteen eighties the company grew fast when the company became a part of the NKT Group. With new owners on board, they concentrated on driving Nilfisk-Advance ahead within the industry, aiming to be an active global player in manufacturing professional cleaning equipment. Nilfisk-Advance is currently represented in all parts of the world due to gradually obtaining many smaller businesses in order to expand their product portfolio and presence in new markets. They are really proud to offer a range of cleaning solutions to meet every requirement.
